## EMPLOYMENT HISTORY

---

September 2015 - Present: **Biostatistician IV**

*Department of Biostatistics, Vanderbilt University Medical Center, Nashville, TN*

I primarily work with the VUMC Center for Critical Illness, Brain Dysfunction and Survivorship (CIBS Center). Our multidisciplinary team is one of the top research organizations in this area, working to describe, understand, and improve in-hospital and post-hospital outcomes among our most critically ill patients. My role involves study design and development of research questions; database design and construction; monitoring and management of prospective data collection; development and execution of statistical analysis plans; communication and visualization of analysis results; and contributing to research manuscripts for dissemination of study results.

I was one of the first two staff members promoted to the senior staff position of biostatistician IV. I work at a high level of independence alongside a biostatistics faculty supervisor to manage the needs of approximately ten principal investigators, with multiple prospective studies enrolling and several analysis projects in progress at any given time.

May 2008 - August 2015: **Biostatistician III**

*Department of Biostatistics, Vanderbilt University Medical Center, Nashville, TN*

Position included supervision and mentorship of database managers and more junior biostatisticians.

June 2005 - April 2008: **Biostatistician II**

*Department of Biostatistics, Vanderbilt University Medical Center, Nashville, TN*

May 2004 - May 2005: **Graduate Student Intern**

*GlaxoSmithKline, Research Triangle Park, NC*

August 2002 - May 2005: **Graduate Research Assistant**

*Biometric Consulting Laboratory, University of North Carolina, Chapel Hill, NC*

## TECHNICAL & STATISTICAL KNOWLEDGE

---

I program primarily in R and have written two packages, currently available on Github:

- ClusterBootMultinom: streamlines process of multinomial regression using cluster bootstrapping (*this package will be undergoing some revamping, summer 2017*)
- JTHelpers: miscellaneous functions written by me and others that I use frequently; several are related to Frank Harrell’s rms package

I use **RMarkdown**, knitr, and  $\text{\LaTeX}$  for reproducible reporting in PDF and HTML formats. I have experience with **Shiny**, Shiny dashboards (example) and flexdashboards (example).

I use **Git** for version control and **Github** for projects as appropriate, including some collaborative work.

My experience includes the following areas of statistical analysis:

- Regression modeling (linear, logistic, ordinal, negative binomial, zero-inflated, survival)
- Time-to-event outcomes, including time-varying covariates and competing risks
- Multiple imputation
- Bootstrapping
- Marginal structural models, inverse probability weighting, propensity scores
- Simulations
- Longitudinal data analysis

I have previously used SAS and C++. I work daily on Mac OS and Linux, and have experience on Windows.
